## DYE-GONE

FOR PROFESSIONAL USE ONLY

A very effective oxidizing dye removal spotter, for all types of dye stains.

### General Usage

This unique 2 part kit designed to remove stains from the toughest coffee spills to organic spills such as orange squash, cola and dye stains including hair dyes or coloured dyes from other cleaning substances such as toilet cleaners etc. On wool fibre simply rinse after use with clean cold water to neutralise and rinse away.

### Directions:

1. Clean the stained area with Chemspec Professional Spot Lifter and rinse. Dry the area as thoroughly as possible by blotting or wet vacuuming. If stain is severe leave P.S.L. in.
2. Spray Dye Gone on the stained area, thoroughly saturating the stain, but not overwetting. Agitation may be done with the tamping brush. After the stain has been removed, rinse the area with cold water and blot.
3. Most stains will respond with a cold application. If required, heat may be added by applying an iron on low setting over a damp towel. **CAUTION:** when using heat monitor closely to make sure the fabric's dye is not affected.

### Hints and Tips

Do not place or store this on any surface that can be damaged by Hydrogen Peroxide solutions.

**Keep away from heat source and store in a dry cool location.**

When replacing solution containers do not cross contaminate Dry Gone A and B. Containers can pressurize and could cause the unit to burst.

Always line up the Dye Gone Sprayer with corresponding letter on top of the label.

The chemistry of this spotter is identical to the Helpmate Coffee Stain Remover Kit and avoids the need for measuring and pouring products.

Saves wastage, time and money whilst preserving the same high performance against all dye stains.

### Dye-Gone Characteristics

<b>pH Value:</b>	<b>9.5 – 10.5</b>
<b>Coverage:</b>	<b>N/A</b>
<b>Dilution:</b>	<b>Dilutes in bottle as you spray</b>
