POWDERED FORMULA 90

FOR PROFESSIONAL USE ONLY

The worlds best selling carpet cleaning detergent. A well buffered detergent for all your heavily soiled carpet cleaning jobs both commercial and domestic. Out performs other professional carpet cleaning detergents.

General Usage

Contains Corrosion Inhibitors

The right combination of proven corrosion inhibitors have been added for maximum protection of all metals commonly found in steam extraction equipment.

Self-Defoaming

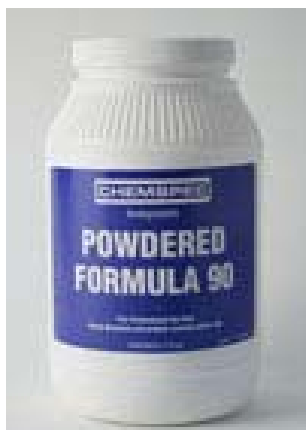

Chemspec's lab-tested and job-proven special defoamers prevent foam build-up in recovery tanks for better equipment performance and cleaning results.

Crisp, Dry Residues

Powdered Formula 90™ dries to a non-tacky, crystalline powder which can easily be vacuumed away. Minimum residue allows for a longer lasting, higher level of appearance between cleanings.

pH Buffered

Special buffering agents have been added to maintain an optimum pH over a wide range of dilutions, allowing for maximum cleaning efficiency

Hints and Tips

Easy to use

To make a concentrated stock solution:

Mix 1.25 kg of concentrate to 17 litres of water

To make a ready-to-use solution:

Mix 30 – 60 mls of product to 19 litres of water

Chemspec Helpful Hints:

Fill your container a quarter full with warm water. While continuing to fill the container with water, gradually add the proper amount of **Powdered Formula 90™** simultaneously until the container contains the proper amount of water according to the instructions. Stir mixture until powder is dissolved.

For optimum defoaming results, mix and use **Powdered Formula 90™** within a 10 hour period.

After 10 hours cleaning performance is not affected, but defoaming capabilities may be reduced.

Powdered Formula 90 Characteristics

pH @ use Value: 10.0 – 11.0

Coverage: Up to 280 sq mtrs per 500g
